

OnShape Permission Form

Dear Parents,

This letter is being sent to you in order to gain parent permission for your child to use a cloud based computer aided drafting (CAD) program called OnShape. I have contacted the Educational Technology department here at BVSD and they have given permission to use OnShape in the classroom with parent permission from the parents of students who are not 13 years of age. In TIDE and Robotics, we currently are using Sketchup as our CAD program. After discussion with other technology teachers in the district, especially the Monarch High School technology teacher, we feel that OnShape will better prepare our middle level students for future classes. OnShape can be added through your child's Google Chrome account and can be accessed at home if they would like to work somewhere other than school.

For a quick overview of the possibilities of OnShape you can visit their webpage at www.onshape.com. OnShape can benefit the students by allowing easier user interface, better 3D printing opportunities, easier access outside of school, and alignment with high school software. Please consider giving your child permission to use OnShape in class as we are trying to implement this new cloud based program as soon as possible (hopefully this week) in our classroom. If you give permission for your child to add OnShape to their BVSD Google account please email me at anthony.muscatello@bvsd.org stating that they have permission or you can fill out this form and have your child return it to me.

Thank you for your time,
Anthony Muscatello
